Mirror 64PXL Wash (DMX) **PA-MI-50300**

The Mirror 64PXL Wash is a revolutionary LED panel, providing its user with the function of a regular mirror when switched off and an unexpected source of colorful light when illuminated. Composed of 64 individually addressable pixels, the DMX controlled Mirror 64PXL Wash allows for the emergence of a huge spectrum of different colorings and is ideal for picturing shapes, images, moving text and replaying video animations.

Making use of a fascinating fusion effect which blends the images in seamless transitions between the pixels, the Mirror 64PXL Wash creates unique washing effects when illuminated, displaying a stunning mergence of millions of vivid colors in myriad shapes and forms.

With the possibility of being used individually or interconnected in multi-panel installations, the Mirror 64PXL Wash offers a very high degree of design flexibility for decorative lighting applications and can be used for adorning any indoor environment.
